Earth Corporation (the “Company”) has been selected as a constituent of the SOMPO Sustainability Index for 4 Consecutive Years, which is independently managed by SOMPO Asset Management Co., Ltd.

The “SOMPO Sustainability Index” is a domestic equity ESG index composed of approximately 300 stocks that excel in ESG (environmental, social, and governance) evaluations. Stocks are selected by combining a proprietary comprehensive ESG scoring system (sustainability assessment)—calculated based on the results of the “Environmental Management Survey” and “ESG Management Survey” performed by SOMPO Risk Management Co., Ltd.—with stock valuation analysis. This index is used as a portfolio of investment targets for “Sustainable Management,” a product designed for institutional investors focused on long-term investing.

In line with our corporate philosophy—“We act to live in harmony with the Earth”—we aim to solve social issues through our business activities and contribute to a sustainable society. We believe that our comprehensive ESG initiatives have led to this continued high evaluation, resulting in our selection for 4 Consecutive Years. These initiatives include strengthening environmental management, providing products and services that contribute to improving public health, creating a “rewarding workplace environment” through the promotion of health and productivity management, and enhancing our corporate governance structure. Going forward, we will continue to deepen dialogue and mutual understanding with our stakeholders, while striving for the sustainable enhancement of corporate value and the further promotion of sustainability management.
